

Notice of Draft Environmental Assessment Study Report Review Eastern Ontario Waste Handling Facility Landfill Expansion Environmental Assessment

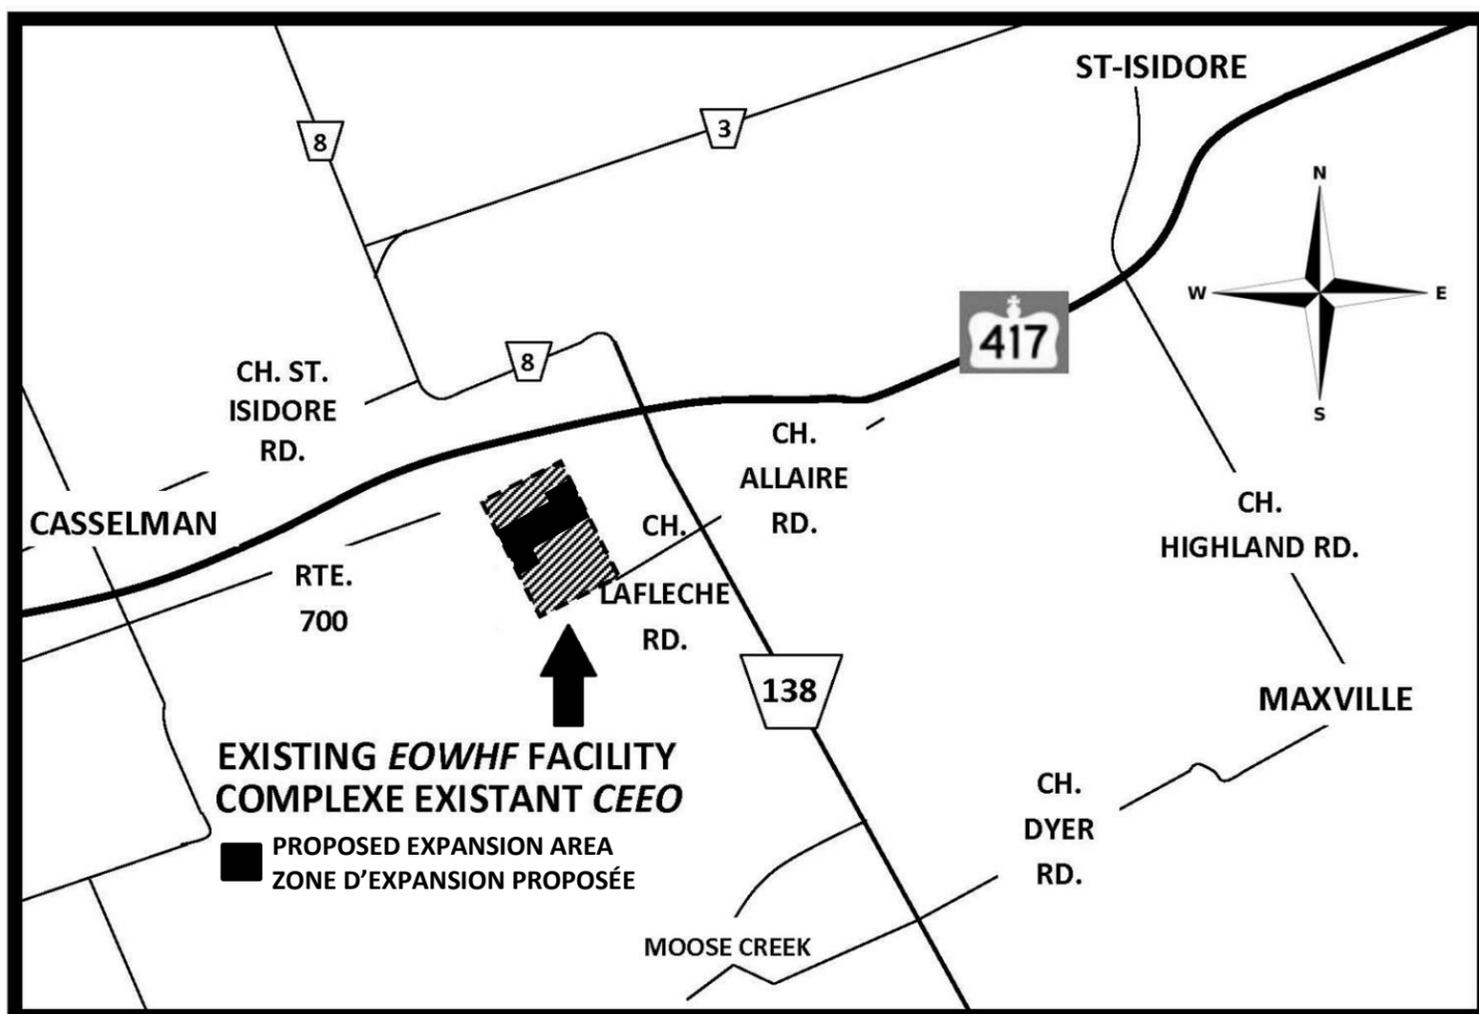

GFL Environmental Inc. (formerly Lafleche Environmental Inc.), the owner and operator of the existing Eastern Ontario Waste Handling Facility (EOWHF) in Moose Creek, Ontario, is undertaking an Environmental Assessment (EA) in accordance with the requirements of the *Environmental Assessment Act* (EAA) seeking approval to expand the disposal capacity of the existing landfill at the EOWHF. The proposed expansion will involve the development of Stage 3B and Stage 4 inside the boundaries of the existing EOWHF. These landfill stages were identified for development in the original approval for the EOWHF.

The EOWHF is located within the Township of North Stormont, approximately 5 kilometres north-northwest of the village of Moose Creek, Ontario, and 5 kilometres east of the village of Casselman, Ontario. The location of the Facility is shown on the Key Plan below. The purpose of the EA is to assess the potential effects of the proposed landfill expansion on the environment.

The Draft EA Study Report will be available for review on January 31, 2018. We ask that you provide any questions or comments to the study team using the contact information provided below by March 5, 2018.

The Draft EA Study Report is available for review on the GFL project website www.leic.com/about/projects and at the EOWHF Administrative Offices, 17125 Lafleche Road, Moose Creek, Ontario.

KEY PLAN

The EA considered two alternative methods for providing the additional disposal capacity within the existing property boundaries for the EOWHF. The development of Stage 3B is the same for both alternative methods. Alternative Method 1 involves developing Stage 4 as a rectangular cell similar to the original plans for the landfill. Alternative Method 2 involves developing Stage 4 in an L-shaped cell. The comparative evaluation of the alternative methods determined that Alternative Method 1 is the Preferred Alternative.

Please provide questions or comments on the Draft EA Study Report to the study team using the contact information below by **March 5, 2018**.
